

Privacy Policy and Disclaimer

At AMR Automotive, we are committed to providing honest, high-quality automotive repairs and maintenance. As a small independent mechanic shop, we take pride in delivering personalized service tailored to each customer's needs. However, it is important to clarify the following:

1. Vehicle Condition & Repair Recommendations:

Our repair recommendations are based on the condition of your vehicle at the time of inspection and the information provided to us. While we strive to identify and address any issues during service, vehicles are complex machines, and unforeseen problems may arise over time. Regular maintenance and prompt attention to warning signs are essential to avoid future complications.

2. Parts and Labor Warranties:

Parts and labor warranties are subject to the policies of their respective manufacturers and suppliers. We will inform you of applicable warranty terms during your service, but it is the customer's responsibility to review and understand these terms. [Your Business Name] cannot guarantee the longevity of parts or repairs outside of the warranty period or scope.

3. Pre-Existing Conditions & Modifications:

We are not liable for issues stemming from prior repairs, damage, or modifications performed by third parties without our knowledge. To ensure the best outcomes, please provide us with accurate and complete information about your vehicle's history.

4. Customer Responsibility:

It is the customer's responsibility to authorize and review all recommended services before work begins. We will always seek your approval for any additional repairs or costs that may arise during the service.

5. Road Testing and Post-Service Issues:

We perform road testing when necessary to ensure repairs are effective and safe. If you notice any concerns after service, please notify us immediately so we can address them promptly.

We value your trust in our business and are here to ensure your vehicle stays reliable and road-ready. Thank you for choosing AMR Automotive for your automotive needs!
